- For use on furniture, cabinets, paneling, floors, trim, doors, beams and more
- Available in ready mix colors that also perform as tintable bases

OLYMPIC® PREMIUM INTERIOR FAST DRY STAIN

PRODUCT OVERVIEW

Olympic Premium Interior Fast Dry Stain in excellent alkyd, fast-drying wiping stain designed to deliver professional results. It is recommended for use on interior woodwork including floors, trim, doors, beams, paneling, and furniture. As part of a one day wood finishing system, it can be used in conjunction with Olympic Fast Dry Varnish for topcoating.

APPLICATION TECHNIQUES

Olympic Premium Interior Fast Dry Stain is best when applied by a professional applicator due to its fast drying time. Before use, stir or shake thoroughly and stir occasionally during application as necessary. On bare wood, apply a uniform coat of Olympic Fast Dry Premium Interior Stain by bristle brush or soft, lint free cloth. Wipe off excess stain with a soft, lint free cloth after suitable penetration time. (Test on scrap wood to determine the best time interval between application and wiping.)

To obtain more density or darker stain effects, repeat the stain application. Test the stain on a piece of scrap wood to confirm final color and appearance. When the stain is dry, apply the balance of the finish system.

ADDITIONAL INFORMATION

Dry time: Allow 24 hours before general use

Recoat time: At least 2 hours before recoating or topcoating

Clean-up: Mineral spirits or paint thinner

Coverage: Approximately 500 to 700 sq. ft. per gallon (125 to 175 sq ft per quart)

Regal Cherry	41573	Quart & Gallon
Rich Mahogany	41574	Quart & Gallon
Jacobean	41575	Quart & Gallon

COMMONLY ASKED QUESTIONS

When should I choose an Olympic Premium Interior Fast Dry Stain over an Olympic Premium Interior Wood Stain?

Olympic Premium Interior Fast Dry Stains have a thicker, fuller body and dry faster than Olympic Premium Interior Wood Stains. Because of their faster drying and recoat times, they are best when applied by a professional applicator. Both stains will provide beautiful color absorption. The applicator's confidence and experience in applying wood stains may determine which product to choose.

Are these ready mix colors and tintable bases? Yes, the Olympic Premium Fast Dry Stains are both ready mix colors that also serve as tintable bases. For instance, the color "deep ebony" is created by adding colorant to the Jacobean 41575 product. Up to ten ounces of colorant can be added to each ready-mix color.

By starting with a tintable color, less colorant is needed to achieve deep, beautiful colors. This reduces dry times compared to traditional bases.

What topcoat is recommended with this product? In professional situations, an applicator can apply the Olympic Premium Fast Dry Stains followed by the Olympic Premium Fast Dry Varnish as part of a one day wood finishing system. However, you can also use the Oil or Water Based Olympic Premium Interior Polyurethane as well as the Olympic Premium Interior/Exterior Spar Finish depending on your needs.

Can a lacquer sanding sealer be applied over the Olympic Premium Fast Dry Stains? It is not recommended to apply a lacquer over the Olympic Premium Fast Dry Stains. However, if necessary, a lacquer may be applied if ample dry time (approximately 24 hours) is allotted and the stain is thoroughly wiped off before applying.
