- Does not raise wood grain
- Low odor
- Ideal for all soft and hard, new and stripped woods
- Goes on smoothly with brushes, cloths, or pads
- Available in a low VOC tint base and eleven ready mix colors

OLYMPIC® PREMIUM INTERIOR WOOD STAIN

PRODUCT OVERVIEW

Olympic Interior Oil Based Wood Stain is designed with a unique Absorption Control™ Formula to provide a beautiful, consistent finish – no blotching, streaking or lap marks.

APPLICATION TECHNIQUES

Olympic Interior Oil Based Wood Stain should be applied with a quality natural bristle brush, cloth or foam applicator. The longer the stain is left on the wood, the deeper it will penetrate the wood pores, and the darker the resulting color. For a light tint, wipe off the excess stain in two or three minutes. For dark, rich color, let the stain stay on for ten minutes or more.

Always wipe off excess stain to remove any stain that has not been absorbed by the wood. To remove excess stain, wipe across the grain with a clean, lint-free cloth. Before the stain dries, make a final finishing wipe in the direction of the grain.

A second coat can be applied to darken the color. To lighten the color, wipe the wood with mineral spirits while the stain is still wet.

ADDITIONAL INFORMATION

Dry time: Allow 24 hours before general use

Recoat time: After 8 hours

Clean-up: Mineral spirits or paint thinner

Coverage: Approximately 125 sq. ft. per quart

For use on: All soft and hard, new and stripped woods

Ideal for: Furniture, cabinets, paneling, trim, doors, floors – all interior wood surfaces

COMMONLY ASKED QUESTIONS

Is sanding required? Olympic Interior Oil Based Wood Stain does not raise wood grain, so sanding isn't required.

Can Olympic Interior Oil Based Wood Stain be tinted to create additional colors? Yes, Olympic's low VOC tint base oil stain can be tinted to 36 colors. Our tint base stain is guaranteed to provide a beautiful, consistent finish.

Is a topcoat/clearcoat necessary? The details of the specific project will largely determine whether a topcoat/clearcoat is needed.

For picture frames, ceilings and other wood projects that will not be in direct physical contact with people or objects, Olympic Interior Oil Based Wood Stain will provide the protection required.

For furniture, cabinets, doors and floors, a topcoat of Olympic Water or Oil Based Polyurethane or Olympic Fast Dry Varnish should be applied to enhance and protect the wood surface.

What are the advantages of Olympic's Absorption Control™ Formula? Unlike ordinary stains, Olympic Interior Oil Based Wood Stains are engineered with unique Absorption Control™ Formula which helps prevent blotching, streaking, and lap marks. Lap marks result from uneven applications of stain. Absorption Control™ Formula helps provide even color absorption to achieve a beautiful, consistent finish.
